Auditory Responses in the Avian Song Nuclei to the Own Song with the Systematic Modification

*Takuya. Koumura¹, Yoshimasa. Seki^{1,2,3}, Kazuo. Okanoya^{1,2,3} ¹The Univ. of Tokyo, Tokyo, Japan ²ERATO, Japan Sci. and Technol. Agency, Tokyo, Japan ³RIKEN Brain Sci. Inst., Wako, Japan

p<0.01, pairwise paired t-test with Bonferroni correction

Conclusion ①			
Average spike rate & Spike timing	in	HVC & Area X	are
sensitive to the local temporal structure			
of the bird's own song			

Conclusion (2)

p<0.05, pairwise paired t-test with Bonreffoni correction

Spike timing is more consistent in HVC > Area X
